I want to apply for Registration

- When we click on submit button the data will be stored in database and message will be displayed "Record Successfully inserted."
- When we click on reset button all filled data displayed in form will be removed.

4. Design following Login Form in PHP.

[20]

The image shows a login form with a rounded rectangular border. At the top center, it says "Login Here". Below that, there are two labels: "User Name :" and "Password :". Each label is followed by a text input field. At the bottom of the form, there are two buttons: "Login" on the left and "Cancel" on the right.

- Create Table named login, when user enter username and password It searches in the database.
- If match found it will be displayed welcome message in new webpage.
- If user enter incorrect username and password it will be displayed error message.
