

Code:

B.Sc. (I.T.) Semester – 6

Paper No. 607: Practical and Viva (P. 604 & P. 605)

Time: 3 Hours

April 2016

Total Marks: 100

J2ME

- Q.1 Develop a J2ME application to create a simple Calculator. [25]
- Q.2 Write a J2ME application to create a user registration form [25]
(Username, Address, Gender, Education, Hobbies, Email address, Phone no. etc.). Display this information after submitting the form.

ASP.NET

- Q.3 Create a Registration Form with fields UNAME (username), [40]
PWD (password), Email, Gender and City. Also Create a Login Form and link them. If user registration is successful, data should be inserted in the users table. If UNAME & PWD are right, the page will be redirected to the success.aspx page with appropriate message, otherwise page will be redirected to Login Page again.
- Q.4 Viva [10]
